

AMBULATORY SURGICAL CENTER Q&A

Q: What is an Ambulatory Surgical Center (ASC)?

A: An Ambulatory Surgical Center (ASC) is a facility separate from a hospital that focuses on a limited number of lower-risk surgeries and tests. It may or may not be owned by a hospital.

Q: What is changing for my plan regarding ASCs?

A: As of July 1, 2026, new rules will go into effect for cost sharing of specific non-emergency procedures when performed at an in-network hospital instead of at an in-network ASC.

Q: What procedures are covered if done at an ASC?

A: The ASC Covered Procedures are:

- Endoscopy (any)
- Intraocular Lens Procedures
- Introduction/Injection of Anesthetic Agent (Nerve Block), Diagnostic or Therapeutic Procedures on the Somatic Nerves
- Injection, Drainage, or Aspiration Procedures on the Spine and Spinal Cord
- Destruction by Neurolytic Agent Procedures on the Somatic Nerves
- Introduction/Injection of Anesthetic Agent (Nerve Block), Diagnostic or Therapeutic Procedures on the Paravertebral Spinal Nerves and Branches
- Hernia surgery
- Carpal Tunnel surgery
- Arthroscopy
- Knee Arthrotomy
- Lumpectomies
- Tonsillectomies
- Colonoscopy (except for preventative colon cancer screenings, which has no out-of-pocket cost to you when done at any in-network facility)

Q: Do all ASCs perform all of the ASC Covered Procedures?

A: No, not all ASCs perform all of the above procedures. Verify that the in-network ASC you want to use will perform your procedure.

Q: What are some benefits for me of using an ASC instead of a hospital?

A: ASCs perform common procedures at no or lower out-of-pocket cost, have shorter scheduling wait times and still have highly trained doctors like in a hospital.

Q: What are the benefits of using an ASC instead of a hospital for the State Health Benefits Program?

A: The SHBP Plan Design Committee recognizes that when ASC Covered Procedures are performed at an in-network ASC they are less expensive to the SHBP than when the procedures are performed in a hospital.

Q: How can I avoid paying more out of pocket?

A: You can have the procedure done at an in-network Ambulatory Surgical Center (ASC).

Q: What if I want to use an out-of-network ASC?

A: If you use an out-of-network ASC, you will have to pay 50% of the coinsurance after your deductible.

Q: What if I want to use an in-network hospital?

A: If you use a hospital, you will have to pay the 50% coinsurance after your deductible. But, there are three cases in which you will not be subject to the 50% coinsurance cost:

- The ASC Covered Procedure is ordered by a provider on an emergency basis that necessitates that it be performed in a hospital; OR
- The member's provider orders the ASC Covered Procedure to be performed in a hospital due to medical necessity or while the member is already or currently admitted to the hospital; OR
- There is no in-network ASC, or in the case of members in the Tiered Network plans no Tier 1 ASC, within 50 miles of the member's residence.

Q: What if I want to use an out-of-network hospital?

A: If you use an out-of-network hospital, you will have to pay 50% coinsurance after your deductible.

Q: How will my appointment be scheduled if I am enrolled in an Aetna plan?

A: Your doctor can schedule you at an in-network ASC for your Covered Procedure. Make sure you verify that the ASC you plan to use is an in-network ASC. If the procedure will be performed in an ASC, no Prior Authorization (PA) is required for Site of Service. The ordering physician must obtain a PA before the procedure is performed at an in-network hospital out-patient department (HOPD). If one of the three exceptions above (emergency, medical necessity, no ASC within 50 miles) does not apply, the procedure will be denied and you will be steered to an appropriate ASC. Aetna will send a letter to the member and provider confirming or denying approval. If the procedure is performed in the HOPD despite the denial, the member will have a 50% coinsurance.

Q: How will my appointment be scheduled if I am enrolled in a Horizon BCBSNJ plan?

A: Your doctor can schedule you at an in-network ASC for your Covered Procedure. Make sure you verify that the ASC you plan to use is an in-network ASC. If the procedure will be performed in an ASC, no Prior Authorization (PA) is required for Site of Service. The ordering physician must obtain a PA before the procedure is performed at an in-network hospital out-patient department (HOPD). There is no denial for a PA for the procedure performed at the HOPD; the member and provider will receive a letter of modification stating that a modified PA is approved and that the member will have a 50% coinsurance if the services are rendered in an in-network HOPD.

Q: What is the process if I use an ASC?

A: Your doctor decides you need an ASC Covered Procedure. Your appointment is scheduled with an in-network ASC. The procedure is performed by highly trained doctors. You go home the same day.

Q: How do I find an in-network ASC if I have an Aetna plan?

A: Follow the instructions for Aetna's website below.

1. Go to <https://www.aetnastatenj.com>.
2. Click on Find a Provider.

3. Enter your location, select **Medical**, and click **View Plans**.

State of New Jersey SHBP and SEHBP Members

Enter your location and pick a plan type. We'll use this info to show you plans and the providers they cover.

Where do you live? Enter a city, county, state or ZIP code.

What type of plan do you need?

5. Search for **Same Day Surgery Center**.

What are you looking for today?

Search by name, specialty or something else

Same Day Surgery Center

6. Select **Same Day Surgery Center** from the list.

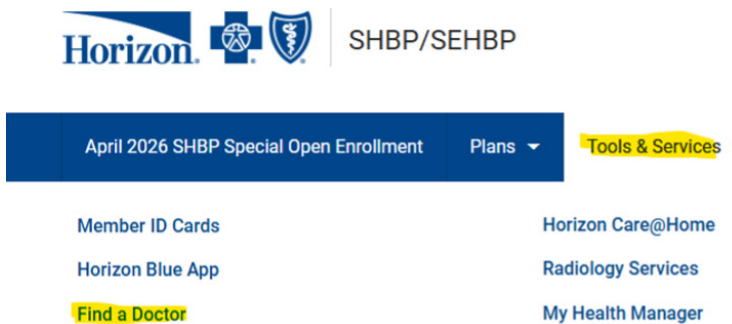

7. A list of providers will be displayed.

Q: How do I find an in-network ASC if I have a Horizon plan?

A: Follow the instructions for Horizon's website below.

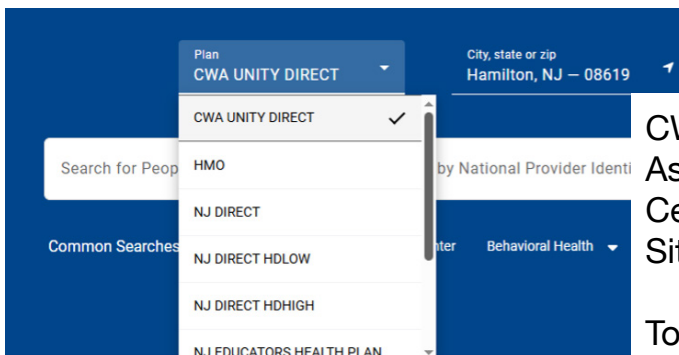

1. Go to <https://www.horizonblue.com/shbp>.
2. Click on **Tools & Services** and then **Find a Doctor**. You do NOT need to log in first.

3. Scroll down and choose **Find a Doctor in New Jersey**.

[Find a Doctor in New Jersey](#)

4. Pick your plan from the dropdown menu.

CWA Added Note:

As of 4/22/2026 the "Ambulatory Surgical Centers" Tile is not yet visible on the Horizon Site.

To find ASC's, select the "Medical Specialties" tile, then select "Other Healthcare Specialities" and then "Ambulatory Surgical Centers".

5. Click on the **Ambulatory Surgical Centers** tile.

6. A list of providers will be displayed.
